

Care & Maintenance

# Guidelines for battery topping using manual filling

## Operating Notes

### Topping up procedures

The battery water level should be checked weekly

---

The battery should always be topped up after charge

---

Do not overfill - keep the visible components just covered (electrolyte visible) - see diagram below

---

Always use demineralised / deionised / distilled water

---

Metal vessels should not be used to store or dispense water

---

Leave the vent plugs in position and closed except when topping up

---

Any spillage on top of the battery should be cleaned off immediately to prevent corrosion

---

## When working on a battery

Use only insulated tools

---

Remove all rings, watches, bracelets or any other metal personal effects

---

Always wear protective clothing

---

Always wear eye protection

---

## Safety Precautions

Do not smoke or expose a naked flame near a battery

---

Areas where batteries are kept or charged must be adequately ventilated

---

If acid is spilled on skin or clothing - wash with plenty of clean water

---

If acid comes into contact with eyes - wash with plenty of clean water and seek immediate medical attention

---

Always switch charger off BEFORE disconnecting or connecting battery

---

# POWER FOR TOMORROW TODAY

The Eternity Technologies range is built using only the highest quality and most efficient production processes at our state-of-the-art manufacturing centre in the UAE.

It is this innovation, modern design criteria and industry-leading machinery that allows Eternity Technologies to not only meet the needs of the global industrial market with increased reliability but define it for the future.
