

Repair & Maintenance

Motive Force

The power behind the power

Repair and Maintenance

Eternity Technologies have invested in buying the newest most modern Motive Power battery company to the UAE. With over 200million AED invested in state of the art manufacturers and design processes at our factory in Ras Al Khaimah.

However, Eternity Technologies recognizes that the investment has to continue into the eld where the product actively works. A key part of this is Eternity Technologies highly trained and equipped service teams that are there to support – you the customer – in your materials handling operations.

In the demanding applications where Motive Power products work can be challenging and occasionally batteries and chargers require repair and maintenance.

Eternity Technologies recognise this and have invested in a support network to help maintain productivity

A fully trained team focused on battery and charger examination and repair

A dedicated operator receives and processes all repair calls

Clear and concise reporting and administration

Advice and recommendations on 'best practices' in battery and charger care and maintenance

Eternity Technologies also offers a range of equipment to help manage and maintain Motive Power battery operations – reducing damage and repairs.

Battery monitoring systems

Fleet management systems

Battery handling equipment

Charger room layout and design

POWER FOR TOMORROW TODAY

The Eternity Technologies range is built using only the highest quality and most efficient production processes at our state-of-the-art manufacturing centre in the UAE.

It is this innovation, modern design criteria and industry-leading machinery that allows Eternity Technologies to not only meet the needs of the global industrial market with increased reliability but define it for the future.
