

Technical Support

Motive Force

The power behind the power

Service Contracts

Eternity Technologies have invested in buying the newest most modern Motive Power battery company to the UAE. With over 200million AED invested in state of the art manufacturers and design processes at our factory in Ras Al Khaimah.

However, Eternity Technologies recognizes that the investment has to continue into the eld where the product actively works. A key part of this is Eternity Technologies highly trained and equipped service teams that are there to support – you the customer – in your materials handling operations.

As the most modern battery company in the world Eternity Technologies recognizes that it needs to invest in supporting our products in the market. With over 200 million AED already invested, Eternity Technologies has the following facilities to support the growing market demands of the Materials Handling market.

Cell stock

Up to 20,000 cells in stock in our dedicated cell storage area

Cells, batteries, chargers, ancillaries

Shorter lead times

Driven by modern stock management and factory systems

Battery build area

Fully equipped battery building area

Ergonomic work stations

All parts and accessories near at hand

Structured BOM designed to match the exact truck requirement

Electrical test laboratory

Fully computerized battery discharge units

Cell emissions tear down and analysis

Optical purity ICP spectrometers to test water and acid

Detailed analysis of key components in cell manufacturing and raw material

Ongoing quality control and testing to design standards

Mass Atomic Spectrometer to test metal specification

Electric microscope to analyse grain texture and purities of the alloys and oxides used in battery manufacturing

POWER FOR TOMORROW TODAY

The Eternity Technologies range is built using only the highest quality and most efficient production processes at our state-of-the-art manufacturing centre in the UAE.

It is this innovation, modern design criteria and industry-leading machinery that allows Eternity Technologies to not only meet the needs of the global industrial market with increased reliability but define it for the future.
